

Feedback Form

UNICEF and the Better Care Network are pleased to share the *Manual for the Measurement of Indicators for Children in Formal Care*.

We welcome feedback regarding the effectiveness and usability of the manual.

In your response, it would be especially useful if you could address some of the following areas:

- Brief overview of how the manual was used or how you plan to use the manual in your activities and programming
- Successes and improvements in quality of care, national or program-specific data collection, policy and advocacy initiatives, and monitoring care services based on your experience using the manual
- Challenges and barriers in using the manual, indicators, and/or gathering information
- Whether there are additional indicators and measurements that should be taken into account for information gathering
- General feedback on the usability, structure, and order of the manual

Please share your views and comments with the Better Care Network, contact@bettercarenetwork.org

The Better Care Network will review all the comments and will make available to those interested. Additionally, the Better Care Network and UNICEF will use this information to make any necessary improvements to the manual and to guide its dissemination.

Thank you in advance for your valuable feedback!
